## ABOUT CONFERENCE

Progressive Education Society's- Modern College of Pharmacy, Nigdi, Pune is organizing an International Conference on 'Emerging trends in Pharmaceutical-Care in Digital Era', Pune, India on February 27th 2023.

Since the concept of Pharmaceutical Care was introduced by developed nations, about twenty years ago, this initiative has become a dominant form of practice for thousands of pharmacists around the world.

Currently, Pharmaceutical care is understood as the pharmacists conciliation to obtain the maximum benefit from the pharmacological treatments of the patients, being therefore responsible of monitoring their pharmacotherapy. As the profession has moved from a product orientation (dispensing medications) to a patient focus, clinical training requirements have expanded. This is a slow but ongoing process, which started from a philosophical point of view, in order to transform the concept of Pharmacy from commodity-based, mercantile operations into a clinical profession in the community pharmacies. It is observed that the positive outcomes obtained with different programs of pharmaceutical care are making a beneficial change in patients' health but still more awareness and research projects should be conducted to support this change.

Today we see that the research and the implementation of pharmaceutical care in many countries focus on some of the core activities such as medication management, pharmacovigilance, patient- counselling, drug information etc. However, researchers and practitioners are still struggling to get pharmaceutical care activities in a broader sense implemented in the best possible way.

The goal of this conference is to provide an excellent opportunity to explore and discuss new concepts and research for the evaluation and implementation of pharmaceutical care services with like-minded colleagues from across the nation and globe. Digital technologies are now integral to daily life, and the world's population has never been more interconnected. Innovation, particularly in the digital sphere, is happening at unprecedented scale. Even so, its application to improve the health of populations remains largely untapped, and there is immense scope for use of digital health solutions. This conference will help not only in understanding this concept but also how best the digital technology can be used appropriately in practice and deliver maximum benefits to patients to obtain maximum and best clinical outcomes.

This conference will harness the power of digital technologies and health innovation to accelerate global attainment of health and the well-being
